- HTML, CSS, Javascript, Bootstrap 4, 5

PROJECTS

Website Social Network Food Review |

09/2023 - 11/2023

Backend Developer

Link Github:

<https://github.com/hoangphuc101202/social-network-review-food>

Frontend: HTML,CSS, Javascript, EJS, Bootstrap 5

Backend:

- Run time NodeJS with ExpressJS Framework.
- Database: MongoDB, Redis.
- Authentication: JWT Authentication
- Realtime with Socket.IO.

Additional Functionalities:

- Design a MongoDB database Schema.
- Integrate Google Authentication to control user's access
- Implement CRUD functionality for post with attached images and real-time commenting using Socket.IO.
- Implement user and post search functionality with unified search box for efficient navigation.
- Define mechanism to handle forgot password functionality, user reauthentication, and password reset. Use Redis technology to enable a one-time access link with a 15 minutes expiration period.
